

**IMPROVE YOUR DAILY GRIND** 

# YOUR DAILY GRIND

At Rex-Cut we are focused on improving the daily grind. This means manufacturing safe abrasive products for metalworkers, creating more efficient solutions for grinding, blending, and deburring applications, while supporting an employee first workplace.

We mean it. Rex-Cut is a 100% employee owned company. From customer service to manufacturing to sales to R&D, we each take great pride in our work, ensuring premium products and exceptional service.

You can rely on the Rex-Cut team to provide top quality abrasive products that improve finishing processes and bottom lines.

# ABRASIVE INFORMATION

Rex-Cut Cotton Fiber products are constructed with our signature abrasive material which is manufactured exclusively in our Fall River, Massachusetts plant, making all of our cotton fiber products Made in the USA.

# **COTTON FIBER ABRASIVES**

Rex-Cut Abrasives is the oldest and primary manufacturer of cotton fiber abrasive grinding and finishing products. Since 1928, Rex-Cut has made abrasive material using a unique process that embeds grain in non-woven cotton fabric. Varying hardnesses and grits are available to produce products that excel on stainless steel, aluminum, mild steel, and exotics.

### **APPLICATIONS**

Our cotton abrasive products are used throughout the world for a variety of applications requiring medium to light metal removal, deburring, and finishing.

Industries using Rex-Cut Abrasives products include:

- aircraft
- dairy
- aerospace
- medical
- automotive
- firearms
- ship building
- energy
- jewelry
- cutlery
- tool and die
- general fabrication
- food processing

# **PRODUCTS**

Our cotton fiber abrasive line includes:

- Mounted Points
- Type 1 Wheels
- Type 27 Grinding and Blending Wheels
- Quick Change Discs
- Finishing Sticks

### **ADVANTAGES**

**Reduced grinding time.** Our abrasives consistently reduce finishing from two or three steps, to just one.

**Non-loading.** Cotton Fiber abrasives are naturally non-loading so they will not clog when working on aluminum.

**Cool action.** Due to the cotton fiber construction, new grain is continually exposed during the grinding process resulting in a cooler operation.

**Smooth, Quiet Action.** Our cotton fiber abrasive material is resilient, which creates very low vibration products. Rex-Cut products run chatter free and are easy on the operator.

**Application tailored.** Many grit, bond, and size options are available to suit specific applications.

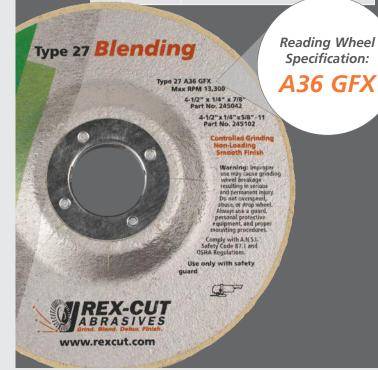

# STANDARD MARKING SPECIFICATIONS

| GRAIN TYPE |                 |  |  |  |  |
|------------|-----------------|--|--|--|--|

<sup>\*\*</sup>Rex-Cut RA values measured with a Mahr Federal Surface analyzer.
The values are an average taken from multiple measurements on
304 stainless steel.

# **MOUNTED POINTS**

For precision deburring, smooth edge breaking, or small weld blending, Rex-Cut Mounted Points are available in many materials and grits to match your application needs.

# **COTTON FIBER MOUNTED POINTS**

Rex-Cut's signature mounted points are engineered for blending, deburring, and finishing machined and cast parts.

# **METALS**

Stainless steel - Aluminum - Exotic metals Mild steel - Brass

### **BENEFITS**

Debur and finish in one step Controlled metal removal without changing part geometry

Long life

Smooth, chatter free operation

Superior surface finishing on stainless steel and aluminum

Non-loading on aluminum, brass, and other non-ferrous metals

# **APPLICATIONS**

# Aircraft/Aerospace

Debur and finish engine components

# Automotive

Debur and finish machined/cast parts

# Tool & Die

Clean, debur, repair, and finish

# Fabrication

Blend corners, break edges, debur and blend I.D. and O.D.

# Jewelry

Remove parting lines and finish castings

# **SPECIFICATIONS**

# **Grit Type**

A: Aluminum oxide

C: Silicon carbide

# **Grain Size**

24, 36: Coarse

54, 80: Medium

120, 180: Fine

320: Very fine (only available in aluminum oxide)

# **Bonds**

GFX: Soft, for light deburring & blending

JTX: Medium, for light deburring with longer life

MTX: Hard, for light to medium stock removal

# **AVAILABILITY**

Rex-Cut mounted points are available in many shape, grain, and bond combinations. Please see the specifications chart above for Grain/Bond options and the Shape Chart on pages 6 and 7 for size availability.

# **UNIQUE QUALITY**

Rex-Cut points create an arch when finishing edges, instead of a bevel. This rounded edge helps distribute pressure more evenly and is useful for precision parts used in high stress applications.

The micro-photos below show a high nickel alloy turbine blade before and after being finished by a W163 A80 MTX point.

# **MEGABRITE UNITIZED MOUNTED POINTS**

Rex-Cut Unitized Mounted Points are made by combining non-woven nylon with resin and either aluminum oxide or silicon carbide to produce a versatile and resilient abrasive option for your deburring, blending, and finishing needs.

# **METALS**

Stainless steel - Aluminum - Exotic metals Mild steel - Brass

### **BENEFITS**

Conformable
Smooth finishes
Enhanced control
Chatter free
Maintain part geometry
Easy to dress to fit profiles and hard to reach areas

# **APPLICATIONS**

Debur machined parts
Blend minor tool marks
Debur and polish orthopedic implants and medical tools
Polish molds and dies
Polish engine parts
Reapply satin finish on stainless steel

# **SPECIFICATIONS**

Grain/Bond A/O Medium S/C Fine

# **AVAILABILITY**

Megabrite Unitized Mounted Points are available in many sizes, please see the Shape Chart on pages 6 and 7 for shape availability.

# **RUBBER MOUNTED POINTS**

Rex-Cut Rubber Mounted Points are made with a formula combining aluminum oxide grain and calendar synthetic rubber which has high tensile strength and is tear resistant. These synthetic mounted points have a softer bond compared to natural rubber and are used mostly for deburring and polishing metals.

# **METALS**

Stainless steel - Aluminum - Exotic metals Mild steel - Brass

# **BENEFITS**

High tensile strength Tear resistant Softer compared to natural rubber

# **APPLICATIONS**

Remove sharp edges on sheet metal Remove visible and microscopic burrs Removing undesirable surface deposits

# **SPECIFICATIONS**

Grain Size

Coarse - Medium - Fine

# **AVAILABILITY**

Rubber Mounted Points are available in many sizes, please see the Shape Chart on pages 6 and 7 for shape availability.

# SHAPE MEASUREMENT GUIDE

# STANDARD MANDREL RECOMMENDED OVERHANG

Overhang (OH) is the distance between the end of the collet and the base of the mounted point.

# **RESOURCES**

For a downloadable mounted point shape chart, visit rexcut.com/mpchart

For help selecting the right point for an application, visit rexcut.com/mp

- \* Standard mandrel / recommended overhang
- Not available in Rubber or Megabrite.

Other shapes might not be available in all materials.

All points with 1/8" diameter are made oversized.

# **TYPE 1 WHEELS**

From braze finishing to pipe thread cleaning to turbine blade profiling, Rex-Cut has you covered with Type 1 Wheel options.

# COTTON FIBER DEBURRING WHEELS

Rex-Cut Type 1 Cotton Fiber Deburring Wheels are manufactured from our signature abrasive materials designed for blending, deburring, and finishing applications.

# **METALS**

Stainless steel - Aluminum Exotic metals - Mild steel - Brass

# **BENEFITS**

Debur and finish, or grind and finish, in one operation

Smooth, controlled grinding action Remove burs without changing part geometry

5x or more life vs. non-woven synthetic fiber wheels

No smearing or back transfer on stainless steel and exotic alloys

# **RESOURCES**

To download a pdf guide that matches frequently used Rex-Cut Type 1 wheels to common applications, visit

### rexcut.com/t1

# **TIP**

Rex-Cut Cotton Fiber wheels can be shaped to better clean or debur grooves such as pipe threads. For a video of this process, visit **rexcut.com/pipethread** 

# **APPLICATIONS**

# Automotive

Chamfer, debur, and finish transmission gears Aircraft/Aerospace

Chamfer, debur, and finish engine components Tool & Die

Debur, finish, and maintenance of dies and molds **Fabrication** 

Radius and blend weld seams, corner blending, and edge breaking

# Oilfield Repair/Maintenance

Debur and clean pipe thread

Ideal for use on robotic applications

# **SPECIFICATIONS**

# Grit Type

A: Aluminum oxide

C: Silicon carbide

# **Grain Size**

16, 24, 36: Coarse

54, 80: Medium

120. 180: Fine

320: Very fine (only available in aluminum oxide)

### Bonds

GFX: Soft, for light deburring & blending JTX: Medium, for light deburring with longer life MTX: Hard, for light to medium stock removal

# LASER BRAZE FINISHING WHEELS

Rex-Cut Type 1 Laser Braze Finishing Wheels have been engineered to finish brazing in roof joints for automotive assembly. These Type 1 Cotton Fiber Wheels are manufactured with the tolerances car manufacturers need in this specific application.

# **BENEFITS**

Blend and finish braze in one step Finish braze in half the time as standard Unitized Type 1 wheels

Wheel integrity controls side deflection, protecting base metal from scarring
Can be made with guide holes if needed
Can be manufactured to required thicknesses
Suitable for both automated and manual use

# **APPLICATIONS**

# Automotive

Blend and finish brazing in assembly plants.

Ideal for use on robotic applications

# **SPECIFICATIONS**

3" & 4" Wheels: Medium Soft High Speed

7" & 8" Wheels: Medium Soft

# **RESOURCES**

For more information on our specialty Laser Braze Finishing Wheels, visit **rexcut.com/laserbraze** 

# **TESTIMONIAL**

"Implementing the Rex-Cut Type 1 Braze Finishing Wheel at our plant to finish roof seams yielded direct results in both increased productivity and the quality of weld finish. This has led to significant cost savings for the production of Ibiza, our best selling car."

 J. Mateo, Engineer at SEAT, a part of the Volkswagen Group in Spain

More sizes available. Contact us at info@rexcut.com with your application specifications and we will work to create a wheel to match your tolerances.

# **HIGH SPEED COTTON FIBER WHEELS**

Manufactured with additional fiberglass reinforcement to meet the speed requirements of higher speed die grinders, these cotton fiber wheels are often used to debur and clean pipe thread.

# **METALS**

Stainless steel - Aluminum - Exotic metals Mild steel - Brass

### **BENEFITS**

Grind and finish, or debur and finish, in one operation Smooth, controlled grinding action Remove burs without changing part geometry 5x or more life vs. non-woven synthetic fiber wheels No smearing or back transfer on stainless steel and exotic alloys

# **APPLICATIONS**

# Oilfield Repair/Maintenance

Debur and clean pipe thread

# Automotive

Chamfer, debur, and finish transmission gears

# Aircraft/Aerospace

Chamfer, debur, and finish engine components Tool & Die

Debur, finish, repair, and maintain dies and molds **Fabrication** 

Radius and blend weld seams, blend corner welds, and break edges

Ideal for use on robotic applications

# **SPECIFICATIONS**

# **Grain Type**

Aluminum oxide Silicone carbide available by special request only

# **Grain Size**

Coarse Medium Fine Very fine

# **Bonds**

Soft: For light deburring and finishing

Hard: Most aggressive bond for deburring with long life

# TIP

Rex-Cut Cotton Fiber wheels can be shaped to better clean or debur grooves such as pipe threads. For a video of this process, visit

rexcut.com/pipe

# **TESTIMONIAL**

"While choosing an abrasive to use in a robotic deburring cell to finish the edge of a turbine blade, the Smooth Touch wheel outperformed non-woven nylon wheels significantly. It was able to obtain the desired finish without changing the part geometry as measured by a laser sensor."

- Normand Stoycheff, Robotic Finishing Expert at AV&R Vision & Robotics

# LARGE DIAMETER WHEELS

# **METALS**

Stainless steel - Aluminum - Exotic metals Mild steel - Brass

# **BENEFITS**

General purpose deburring and finishing Longer life vs. other non-woven products Debur and finish in one operation

# **APPLICATIONS**

### Jewelry

Chamfer, debur, blend, and finish (available in split and beveled)

# Cutlery

Fork tining and finishing

# Aircraft/Aerospace

Grind, debur, and finish engine parts

# **Food Service**

Debur edges on pots and pans/kitchen equipment

# Automotive

Debur and finish machined/cast parts. Blend and finish brazing in assembly plants.

# **Food Service**

Repair and maintenance

# **SPECIFICATIONS**

# **Grit Type**

A: Aluminum oxide

C: Silicon carbide

# **Grain Size**

16, 24, 36: Coarse

54, 80: Medium

120, 180: Fine

320: Very fine Only available in aluminum oxide

# Bonds

GFX: Soft, for light deburring & blending

JTX: Medium, for light deburring with longer life

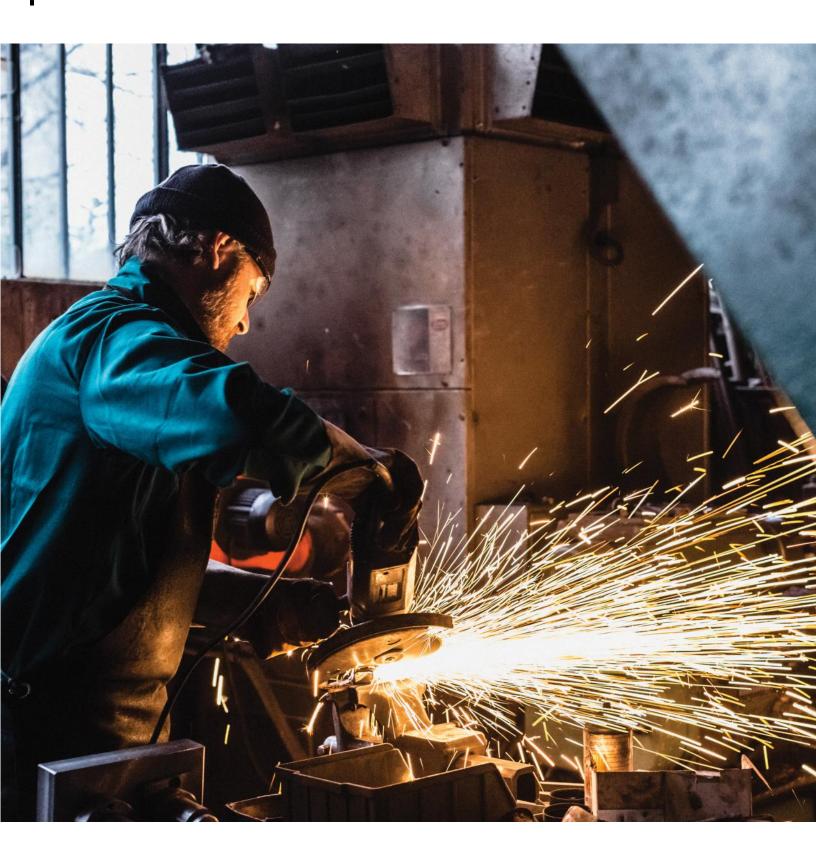

MTX: Hard, for light to medium stock removal

# **DEPRESSED CENTER WHEELS**

From grinding heavy welds to applying finishing touches, our line of depressed center wheels covers a wide range of applications.

# **SIGMA GREEN**

Sigma Green is an aggressive grinding wheel with noticeably quiet and smooth grinding action. Our best selling grinding wheel is the perfect balance of fast grinding, low vibration, and superior finish. The layered grain construction, coarse grain followed by a second layer of finer grain, gives this wheel the advantage of fast grinding with a superior finish.

**METALS** 

High performance zirconium and aluminum oxide grain combination
Fast stock removal
Superior finish
Grinds smooth and quiet
Minimizes operator fatigue
Controlled grinding
Cool cutting
Won't discolor or warp stainless steel
Reduces labor rates

Stainless steel - Mild steel - Hard face - Titanium

# **APPLICATIONS**

General fabrication
Shipbuilding
Tank fabrication
Power plant maintenance and repair
Refinery maintenance and repair

# **RESOURCES**

To watch the fast grinding ability of Sigma Green, visit **rexcut.com/sigmagreen** for a demo video.

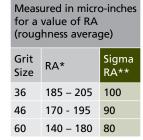

# VIRTUALLY IRON FREE

Contains only 0.035% iron, with less than 0.1% of iron, chlorine, and sulfur combined.

# TIP

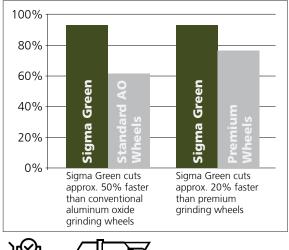

Follow Sigma Green or Sigma Green Max with Max Flex 54 grit to achieve a #4 finish.

# SURFACE FINISH COMPARISON

\*Industry data for conventional abrasives on stainless steel \*\*Rex-Cut RA values are measured with a Mahr Federal Surface analyzer. Values are an average from multiple measurements on 304 stainless steel.

# **TYPE 27 GRINDING & BLENDING WHEELS**

Manufactured with our signature abrasive materials, these Type 27 wheels are designed for grinding and blending in one step.

# **METALS**

Stainless steel - Aluminum - Exotic metals Mild steel - Brass

# **BENEFITS**

Grind and finish in one step
Smooth, controlled grinding action
Non-loading on aluminum
Superior surface finishing on stainless steel and
aluminum
Long life and durability

# **SPECIFICATIONS**

# **Grit Type**

A: Aluminum oxide C: Silicon carbide

### **Grain Size**

24, 36: Coarse 54, 80: Medium

# **Bonds**

**GFX: Blending:** Flexible synthetic latex bond used for blending and finishing applications. It resists loading on aluminum and is resilient for a smooth, chatter-free operation on tanks, vessels, kitchen and food processing equipment, trailers, and other fabrications.

MTX: Grinding: Tough resin bond used for light or medium weld removal. The resin bond provides a faster cut rate. It also resists loading on aluminum and offers excellent results on all non-ferrous materials.

# **TYPE 27 MAX FLEX**

This flexible grinding/blending wheel excels on aluminum and is constructed to give the user wide contact area, allowing for optimum blending control as well as a very consistent finish.

# **METALS**

Aluminum - Stainless steel - Exotic metals Mild steel - Brass

# **BENEFITS**

Naturally non-loading when grinding aluminum Blend and finish on both flat and contoured surfaces Blend and finish with one disc Very low vibration, easy on the operator Wide contact area allows for better surface finish Grain embedded throughout wheel, allowing for a consistent finish throughout life of wheel No backing that could gouge work surface Cool grinding action

# **APPLICATIONS**

Food processing equipment Aluminum trailers Tank fabrication Aluminum boats

# **RESOURCES**

To see what Max Flex can do, visit rexcut.com/maxflex for a quick demo video.

# **TIPS**

Excellent as a second step after Sigma Green Use at a 45° angle for increased cut Use at 30° angle for smoother finish Use in place of flap discs for more consistent finish

# **FUSION INTERLEAF FLAP DISCS**

The combination of a premium coated abrasive layer over non-woven surface conditioning material is what makes Fusion a superior flap disc. Fusion easily blends and finishes welds in one operation. Grain size is calibrated in order to match a #4 finish.

# **METALS**

Stainless steel - Aluminum - Mild steel - Brass

# **BENEFITS**

Blend and finish stainless steel in one step Match a satin finish Very controlled weld grinding High quality finish

# **APPLICATIONS**

Blend corner welds on stainless steel railings Blend small TIG welds on stainless steel kitchen equipment

# **SPECIFICATIONS**

Coarse, Medium, Very Fine

# TIP

While working on stainless steel with a satin finish, run this product in the same direction as the scratches to match the grain.

# **RESOURCES**

Fusion Medium is the first step in our Stainless Steel Tube Finishing Kits. To watch our instructional video on finishing tube and railing corners and see Fusion in action, visit **rexcut.com/polish** for polish finish or, **rexcut.com/satin** for satin finish.

# **CUT-OFF WHEELS**

Quickly and precisely cut metal with our premium line of cut-off wheels. Formulated per metal, these wheels cut cool, extremely fast, and are excellent for cutting pipe, tubing, rod, and sheet metal.

# **ALPHA-GREEN**

Extremely fast and cool cutting action on stainless steel. Excellent for cutting applications on pipe, tubing, rod, and sheet metal.

# **METALS**

Stainless Steel - INOX formula is specialized for stainless steel, but Alpha-Green Cut-Off Wheels can be used on all types of steel.

# **SPECIFICATIONS & BENEFITS**

# A60-INOX-BF

Aluminum oxide 60 grit Stainless steel formula .040" thickness Reinforced resinoid For extremely fast cutting Cuts cooler

Thin profile produces less of an exit bur

# A46-INOX-BF

Aluminum oxide 46 grit Stainless steel formula 045" thickness Reinforced resinoid For fast cutting Longer life

# **VERSA-CUT**

Extremely fast, cool cutting action on all metals. General purpose cutting wheel constructed with a fiberglass reinforced resinoid bond for free cutting action.

# **METALS**

All ferrous and non-ferrous metals

# **BENEFITS**

Premium aluminum oxide grain for optimum performance Fast cutting Cool cutting

# **Applications**

Cutting tube, pipe, rails, rebar, and sheet metal Trim castings

# **QUICK CHANGE DISCS**

For smaller welds, hard to reach areas, or small working surfaces, we have a range of quick change discs to help with your finishing applications.

# **COTTON FIBER QUICK CHANGE DISC**

Remove small welds, blend machine tool marks, debur, and break edges with our original Cotton Fiber Quick Change Discs.

# **METALS**

Stainless steel - Aluminum Exotic metals - Mild steel Brass

# **BENEFITS**

Outlasts coated quick change discs by a minimum of 10:1

No smearing on titanium and stainless steel

Grinds and finishes in one step

Smooth controlled metal removal

Non-loading on aluminum and brass, as well as kevlar and other composites

Superior surface finishing

# **APPLICATIONS**

# Aircraft/Aerospace

Debur edges and blend mill marks on aluminum skin for fuselage/wings

# **Food Service**

Blend and finish stainless steel kitchen components

# Automotive

Grind and blend spot welds on galvanized steel auto frames

# **General Fabrication**

Grind and blend light weld seams

# **FUSION QUICK CHANGE DISC**

The combination of a premium coated abrasive layer over non-woven surface conditioning material is what makes Fusion Quick Change Discs superior. Fusion easily blends and finishes light welds in one operation. Grain size is calibrated in order to match a #4 finish.

# **METALS**

Stainless steel Aluminum Mild steel Brass

# **BENEFITS**

Controlled material removal Consistent and low Ra-value Low heat generation Shock dampening effect

# **APPLICATIONS**

Finishing light weld seams Improving surface roughness Refining coarse grinding lines Breaking edges Grinding down casting errors

# **AVAILABILITY**

# **ABRASIVE SAFETY**

At Rex-Cut Abrasives, safety is a priority. Our products are manufactured under strict guidelines and we only produce high quality, safe products. The safety information below should be used only as a guide for the Rex-Cut Abrasives range of products. Safety continues with the operator, please read and share the information below.

### **SAFTEY INFORMATION**

This safety information should be used only as a guide for the Rex-Cut Abrasives range of products.

- 1. Check all wheels for cracks or other damage before mounting.
- 2. Check machine speeds against maximum operating speed of the wheel.
- 3. Be sure that the wheel bore, threaded or unthreaded, fits machine arbor properly and that flanges are clean, flat, and of the proper type for the wheel you are mounting.
- 4. Run the wheel in a protected area at least one minute before grinding.
- 5. Wheels must be properly guarded.
- 6. Wear protective safety glasses or a proper face shield.
- 7. Do not use wheels which have been dropped or otherwise damaged.
- Do not use excessive pressure when mounting wheels between flanges.
   Tighten nut sufficiently to hold wheel firmly.
- 9. Do not use heavy side grinding pressure on any Type 1 straight sided wheel.
- 10. Do not mount more than one wheel on a single arbor.

### **STORAGE**

Rex-Cut Abrasive wheels should be stacked flat, not on their edges. Store in a dry area.

# **RPM / SFPM SPEED CONVERSIONS**

# **Definitions:**

SFPM = Surface Speed in Feet per Minute RPM = Revolutions per Minute M/S = Meters per second

The SFPM for most T27 bonded grinding wheels is approximately 15,600. Note that this is equal to the European standard of 80 M/S or 13,300 RPM for a 4-1/2" diameter wheel.

### **Calculations:**

- to convert RPM to SFPM.....SFPM = (RPM x DIA) / 3.82
- to convert SFPM to RPM.....RPM = (SFPM x 3.82) / DIA
- to convert M/S to SFPM..... M/S x 197
- to convert SFPM to M/S..... SFPM x .005

For more information regarding Safe Operating Speeds, refer to ANSI B.7.1 Table 23 - "Standard maximum speeds in surface feet per minute" and Table 35 - "Conversion Table - Wheel speeds"

# **GENERAL TECHNICAL DATA - METALS**

# **ALUMINUM GRADES**

| NON-HEAT TREATABLE ALLOYS |  |  |  |
|---------------------------|--|--|--|
| GRADE                     | DESCRIPTION  |  |  |
| 1100                      | The purest aluminum alloy excellent for forming                                    |  |  |
| 3003                      | This alloy is similar to 1100 with higher strength                                 |  |  |
| 5005                      | Anodizing quality with excellent corrosion resistance                              |  |  |
| 5052                      | Good forming, welding, and corrosion resistance                                    |  |  |
| 5086                      | $\label{thm:light} \mbox{High strength superior atmospheric corrosion resistance}$ |  |  |
| 5456                      | Highest strength alloy of the non-treatable grades                                 |  |  |

| HEAT TREATABLE ALLOYS |   |  |  |
|-----------------------|---|--|--|
| GRADE                 | DESCRIPTION   |  |  |
| 2024                  | High strength alloy with fair workability and machining qualities |  |  |
| ALCLAD<br>2024        | The high strength of 2024 with excellent corrosion resistance.    |  |  |
| 6061                  | Good strength and workability. The best alloy for anodizing.      |  |  |
| 7075                  | Very high strength and hardness. Good machining characteristics   |  |  |
| ALCLAD<br>7075        | The high strength of 7075 with good corrosion resistance          |  |  |
|                       |   |  |  |

# STAINLESS STEEL GRADES

| GRADE     | DESCRIPTION   |
|-----------|---|
| 304       | Low carbon  |
| 304L      | Extra low carbon  |
| 309/309\$ | High temperature strength and scale resistance                                    |
| 310/3105  | Similar to 309 with higher alloy content  |
| 316       | Best corrosion resistance   |
| 316L      | Extra low carbon variation of 316   |
| 321       | Stabilized with titanium for welds subject to severe corrosion                    |
| 410/4105  | Low cost general purpose stainless. Used where corrosive environment isn't severe |
| 430       | A non-hardening straight chromium grade   |

# **RMS AND RA FINISHES**

| STANDARD<br>SHEET FINISHES | RMS   | RA    | COTTON FIBER ABRASIVE<br>SPEC. REQUIRED TO<br>ACHIEVE THIS FINISH |  |
|----------------------------|-------|-------|---|--|
| No. 3                      | 30-45 | 25-40 | A54GFX  |  |
| No. 4                      | 18-30 | 15-25 | A80GFX  |  |
| No. 6                      | 14-20 | 12-18 | A120 - A180GFX  |  |
| No. 7                      | 5-9   | 4-8   | A320GFX   |  |
| No. 8                      | 1-5   | 0-4   |   |  |

# STANDARD MILL FINISHES

| NO.   | DESCRIPTION  |
|-------|--|
| No. 3 | A semi-coarse<br>unidirectional<br>uniform finish                                    |
| No. 4 | A finer ground<br>unidirectional finish<br>commonly referred<br>to as a satin finish |
| No. 6 | A non-directional semi-polished finish   |
| No. 7 | A buffed finish<br>having a high<br>degree of<br>reflectiveness                      |
| No. 8 | A blemish free<br>finish with a high<br>degree of clarity, a<br>true mirror finish   |
